

Please don't approve of HR 4026. Satellite radio should be able to carry stations that offer local traffic and weather reports. This is a no brainer. Satellite radio charges a fee to its subscribers, and your body should not waste my taxpayer money on this issue. You should not be involved at all on what content we subscribers want to have. Whatever happened to the 1st ammendment, and freedom of speach?Please vote against HR 4026.

Sincerely, Ron Aaron
